OBJECTIVE

- A final-year B.Tech Computer Science student at Ajay Kumar Garg Engineering College with hands-on experience in full-stack web development, API integration. Seeking a challenging role in a dynamic organization where I can contribute technical expertise, problem-solving ability, and a strong foundation in software development to build impactful digital solutions.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap5

Frameworks/Libraries: Reactjs, Nodejs, Expressjs, Nextjs

Databases: MongoDB, SQL

Cloud/DevOps: AWS (EC2, S3 basics)

Tools Platforms: Postman, GitHub, VS Code, Canva, MS Excel

PROJECTS

LoveFood | LoveFood – Food Delivery Website

Jan 2025

- Stack: React.js, Material-UI, Bootstrap, Node.js, Express.js, MongoDB
- Engineered a MERN-based food delivery platform with JWT-based user auth and secure order flow.
- Enabled order placement, history tracking, and dynamic menu control via MongoDB.
- Crafted responsive UI using Material-UI and Bootstrap for optimized UX.
- Developed RESTful APIs ensuring smooth frontend-backend integration.

Document Editing Tool | Collaborative Editor, JavaScript

Jan 2024

- Built a real-time collaborative text editor using React.js, Socket.io, MongoDB, and Quill.
- Implemented live multi-user editing with WebSockets for seamless real-time sync.
- Integrated Quill.js for rich text editing with customizable formatting options.
- Enabled persistent document storage and retrieval via MongoDB backend.
- Delivered an interactive, responsive UI ensuring optimal user experience.

Authentication System | React, JavaScript, MongoDB

June 2024

- Built backend for YouTube clone with secure user auth and token-based session handling.
- Used Node.js, Express.js, and MongoDB for scalable RESTful API development.
- Implemented bcrypt for password encryption and JWT (access refresh tokens) for auth.
- Integrated Multer for efficient file uploads and storage handling.

EXPERIENCE

Web Development Intern – CODESOFT (Virtual)

1 month

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Built a To-Do App and Calculator, focusing on clean UI/UX and functionality.
- Strengthened fundamentals of DOM manipulation and responsive layout design.

EDUCATION

AKGEC, Ajay kumar garg engineering college, ghaziabad

2022 – 2026

B.Tech - Computer Science (H) - **CGPA - 8.2**

Ghaziabad, Uttar Pradesh

Dr. Savita memorial global academy

2019 – 2021

senior secondary school – **percent - 93%**

Chunar, Mirzapur

CERTIFICATIONS

- Figma Bootcamp – LetsUpgrade Jan 2025
 - Postman API Fundamentals Student Expert – Postman Feb 2025
 - AWS APAC Solutions Architecture Job Simulation – AWS (Forage) Jun 2025
- Completed hands-on tasks on designing simple, scalable hosting architecture.

ACHIEVEMENT

* Selected in SMART INDIA HACKATHON 2023

* Solved **200+** Problems on **Leetcode**.
